

# Dutch Valley Bluetooth Scanner Set Up - Follow instructions below to set up the scanner on iOS

**STEP 1:** Pairing the Scanner to an Apple Device—Scan the Default Product Defaults Barcode

**STEP 2:** On Your iOS device, go to Settings —> Bluetooth, turn on Bluetooth.

Stay on this screen until you complete the steps to pair scanner. Scan Bluetooth HID Keyboard Connect Barcode and wait for it to appear on your iOS device. Once your device has located the scanner, select “Voyager 1602g scanner” name from list displayed to connect

**STEP 3:** Virtual Keyboard—Scan the Virtual Keyboard On—Short Press Barcode

**STEP 4:** LED—Good Read—Scan the LED—Good Read On Barcode

**STEP 5:** Beeper—Good Read On—Scan the Beeper—Good Read On Barcode

**STEP 6:** Scan Barcode for the desired beeper volume (Scan Only ONE)
